Experience Details

Senior Digital Product Manager at Accorplus

Sydney, NSW

Aug 2025 – Till date

Leading digital product strategy, transformation and growth for ALL Accor+ Explorer, Accor's paid loyalty subscription product. Driving the product lifecycle from discovery and roadmaps through build, launch and continuous optimisation across acquisition, engagement and retention journeys.

Key Responsibilities & Achievements:

- Own the **digital product strategy and 2026 roadmap** for ALL Accor+ Explorer, aligning strategic priorities, customer needs, projected commercial value, delivery effort and dependencies with Accor's central product teams in Paris.
- **Established a structured product prioritisation and governance framework** incorporating Lean Canvas, OKR alignment, benefits forecasting, effort estimation and RICE prioritisation. Shifted executive discussions from stakeholder-led delivery requests towards transparent, value and ROI-based investment decisions.
- Led **conversion rate optimisation across Accor Plus acquisition journeys**, using funnel analysis, customer behaviour insights and experimentation to address high landing-page abandonment. New variants incorporating savings and brand trust propositions generated a threefold increase in click-through rate and a 0.3 percentage-point increase in end-to-end conversion.
- Lead the strategy, discovery and delivery of **new acquisition products and customer journeys**, including member referrals, retail gift memberships, bulk subscriptions, abandoned-journey retargeting and Accor Friends & Family memberships.
- Led the digital workstream of ALL Accor+ Explorer's **expansion into new markets, including Japan and the UAE**, through the development of market-specific websites, localised content, language translations, regional payments, analytics and regulatory compliance.
- Designing **on-property acquisition journeys** that convert hotel guests into Explorer members at high-intent moments, including property-specific QR codes at reception and mobile-optimised journeys following hotel Wi-Fi registration.
- Defined a **retail gifting proposition** enabling customers to purchase multiple memberships, schedule delivery and support recipient redemption through a streamlined voucher-based journey, creating a new acquisition channel and higher-value transaction opportunity.
- **Partner with Accor's global product team to integrate Explorer into the ALL.com hotel-booking journey**, designing a low-friction cross-sell experience projected to generate \$11.2 million in membership revenue while protecting completion of the core hotel-booking journey.
- Developed an **abandoned-registration retargeting proposition** focused on customers leaving at the payment stage, including benefits modelling that identified approximately \$0.8 million in potential incremental annual revenue.
- Driving a two-phase technical **SEO remediation program** to strengthen organic visibility, crawl efficiency and conversion across Accorplus.com. Prioritised improvements to indexation, canonical and hreflang configuration, sitemaps, structured data, content rendering and AI-agent discoverability, with a projected 21.6% uplift in organic traffic.
- Leading engagement-focused product initiatives to increase member value and hotel participation, including **digitising the hotel-offers sourcing** process, improving offer quality and scalability, enabling multilingual content and laying the foundations for offer storage, distribution and personalisation.

- Work across digital, technology, marketing, commercial, finance, legal, brand, data and hotel operations teams to define customer journeys, product requirements, measurement plans, release readiness and go-to-market activities.
- Manage dependencies with Accor's global platforms and product teams, shaping solutions that can be integrated into Accor's global architecture.
- Apply customer research, GA4 funnel analytics, Hotjar behavioural insights and A/B testing to identify customer pain points, prioritise opportunities and continuously improve acquisition and subscription experiences.
- Led a **comprehensive audit and remediation of GA4 and Google Tag Manager** with D-EDGE, resolving attribution, tagging and tracking issues and establishing standardised funnel reporting segmented by customer type. Improved stakeholder confidence in digital performance data and enabled self-service decision-making.

Senior Product Manager at Endeavour Group

Sydney, NSW

Nov 2020 – July 2025

DanMurphy's

Led the strategy, ideation, development and launch of multiple digital products & innovations for Dan Murphy's and BWS including:

- Launch of a cutting-edge **AI/ML driven search engine for Dan Murphy's and BWS**, resulting in a 72.2% reduction in "no search results" and a 2.79 percentage point increase in product click-through rate, significantly improving search efficiency and customer engagement.
- Implementation of **machine learning-driven product recommendations** on Dan Murphy's web and mobile app, leveraging user behaviour data to deliver personalised suggestions, enhance customer engagement, and drive conversion rates.
- Designed and delivered a **best-in-class search and discovery experience across Dan Murphy's and BWS web and app**, enhancing usability and findability, resulting in a 1.13 percentage point increase in click-through rate (CTR).
- Successfully launched a product **image-based search feature** on Dan Murphy's & BWS mobile apps, leveraging **Computer Vision AI technology**. Delivered exceptional results, generating \$5.02M in revenue within the first six months and enhancing the customer shopping experience. **Featured in national media (9News)** for expertise in digital innovation: [9News Article](#).
- Launched Dan Murphy's **in-store Augmented Reality** feature, "Scan for Ratings & Reviews" that uses **Computer Vision AI, batch scanning and augmented reality** to display product attributes as AR overlays on the bottles in store, empowering customers to make informed purchase decisions by providing instant product insights and enhancing the in-store shopping experience.
- Launched a new promo mechanic for **BWS 'Appy Deals'** and building the option to **link it with EDR** (everyday Rewards) that led to a huge uplift in app engagement and omnichannel sales (+200% increase in monthly active users)
- Led the successful implementation of **Single Sign-On (SSO)** integration between Dan Murphy's website/app and Dan's Gifting Hub. Core to this solution was the migration to a new Customer Identity & Access Management platform (Azure B2C), streamlining & securing user access and improving the customer experience through seamless navigation across platforms.
- Conceptualised and implemented the **Pricing-as-a-Service** solution for Dan Murphy's to ensure accurate and real time pricing and promotion updates to Dan Murphy's customers across all channels.
- Built an innovative **In-store navigation system for Dan Murphy's**, leveraging advanced wayfinding technology to assist customers in quickly locating products, enhancing convenience and improving the overall shopping experience

Roles & Responsibilities:

- Defined and led product strategy and vision, translating business goals into actionable roadmaps aligned with OKRs.

- Led 2 cross functional product teams (20+ members) including designers, delivery leads, technical & functional analysts, data scientists, engineers and QAs delivering measurable customer and business outcomes.
- Effectively managed and prioritised product backlogs by collaborating with stakeholders and development teams, ensuring alignment with strategic business goals and customer value.
- Partnered with stakeholders to gather, analyse, and document business requirements, translating them into user stories, epics, and acceptance criteria for development teams.
- Facilitated workshops, sprint planning sessions, and backlog refinement meetings to ensure alignment with Agile practices and product goals.
- Maintained continuous engagement with engineers and QA teams to ensure digital products were developed in alignment with defined requirements and quality standards.
- Utilised data-driven decision-making by leveraging customer research, insights, analytics, and A/B testing to inform product strategies, prioritise features, and continuously optimise user experience and business outcomes.
- Supported User Acceptance Testing (UAT) by creating test cases, validating functionality, and ensuring solutions met business needs.
- Advocated for continuous improvement by analysing workflows and identifying opportunities for optimisation, reducing inefficiencies and improving team productivity.
- Led product adoption and change management efforts, driving engagement and training sessions, enabling stakeholders to transition effectively to new systems and processes
- Led benefits realisation tracking across key product initiatives, defining success metrics, monitoring performance against KPIs and providing data-driven insights to ensure alignment with strategic business objectives.
- Oversaw contract lifecycle management for multiple platforms, including renewals and amendments, ensuring compliance with terms and timely execution
- Created detailed business cases for multiple initiatives outlining problem statements, proposed solutions, cost-benefit analysis, and ROI projections. Presented findings to senior leadership, securing buy-in and approval for strategic initiatives.
- Conducted comprehensive vendor evaluations to assess capabilities, alignment with business requirements, and cost-effectiveness, ensuring optimal selection for digital solutions and platform implementations. Developed Key Decision Documents (KDDs) to present findings and recommendations to stakeholders.

Product Owner at Etihad Airways

Contracted through Cognizant
Abu Dhabi, United Arab Emirates
Feb 2016 – Nov 2020

Key Initiatives:

Digital Marketing Transformation for Etihad Airways

The key objectives of this program:

- Building **Omni-channel personalised communications** across Etihad's digital touch points leveraging the **Adobe Marketing Cloud**.
- Building a **single marketing view** of the customer using data from multiple sources and stitching them together to create unique profiles
- End to End migration from Salesforce Exact Target to Adobe Campaigns Manager
- **Managed Etihad Airways' complete Adobe-based martech stack**, delivering Adobe Campaigns, Analytics, Target and Audience Manager capabilities that powered automated personalised journeys and uplifted engagement across global digital channels.

Roles & Responsibilities:

- Product ideation workshops focused on enhancing customer experience, customer engagement, revenue opportunities and loyalty acquisition. Leveraged Adobe Marketing Cloud capabilities, such as advanced personalisation and automation, to deliver personalised customer journeys and improve engagement metrics.
- Requirement elicitation workshops with relevant stakeholders to elaborate epics, features and user stories
- Building and managing the product backlog, backlog refinement, writing user stories, creating acceptance criteria, facilitating sprint reviews, supporting user acceptance testing (UAT) and release activities
- Participating in PI planning, Program Backlog Refinement, Feature prioritisation using WSJF (Weighted Shortest Job First) & system demos
- Facilitated integration between Adobe Experience Cloud and existing systems, including websites, DAM platforms, Analytics tools & the Enterprise Data Lake ensuring a cohesive digital ecosystem.
- Benefits realisation tracking & reporting
- Creation of as-is and to-be marketing operating models, enabling marketing operations to realise full potential from the new marketing capabilities.

Digital Transformation Strategy for Etihad Airways

Worked with Etihad Airways to create its digital transformation strategy and reimagine the entire customer digital experience. The client wanted to embark on an extensive effort over the next 4-5 years to transform the digital guest experience and put itself ahead of the competition in the digital innovation space.

Roles & Responsibility:

- Workshops with stakeholders from multiple departments across the organisation to understand the digital vision, the need for change and identify current pain points.
- Creating detailed customer journey maps to understand the pain points with the current digital experience across different stages of the customer journey.
- Creation of a comprehensive digital capabilities matrix for each stage of the customer journey that is aligned to the client's strategic objectives and the best-in-class digital trends in the industry.
- Prioritisation of the digital capabilities and mapping dependencies
- Creation of a structured roadmap for the phased implementation of the suggested capabilities
- Identification of Quick Wins & the creation of a business case for the implementation of the proposed digital transformation strategy

Lead Business Analyst at Virgin Atlantic Airways

Contracted through Cognizant
Crawley, United Kingdom
2011– 2015

Passenger Sales System (PSS) Migration for Virgin Atlantic Airways

Worked as a senior agile business analyst for the digital work stream in the PSS (Passenger Sales System) migration program for Virgin Atlantic Airways. The migration involved completely rebuilding the airline's customer digital experience across all touchpoints, while migrating from HP Shares to the new PSS platform, Deltamatic, offered by Delta Airlines.

Roles & Responsibilities:

- Conducted comprehensive gap analysis between legacy and the new PSS to identify functional differences that would impact Virgin's online capabilities.
- Collaborated with product owners, UX/UI and technology teams across Delta and Virgin to align digital channel features (web & mobile) with new PSS capabilities.
- Developed & maintained the product backlog for the new website, mobile site & mobile app.
- Managing the product backlog, backlog refinement, elaborating user stories, creating acceptance criteria, sprint review and facilitating UAT, supporting release activities
- Liaised with distributed development teams from across the globe driving the implementation of the proposed features and integration with the PSS backend
- Business Process Reengineering for all ecommerce functions.

New Mobile App & Website for Virgin Atlantic Airways

Worked as a senior business analyst for Virgin Atlantic in their new website & mobile app development program. The project involved a multi-million-pound modernisation of the ecommerce platform, building new features & functional enhancements supported by a cutting-edge architectural design. This was a distributed agile (scrum) project with remote design, development and test teams located in London, Romania, India, and the USA

Roles & Responsibilities:

- Liaising with business stakeholders to elicit & analyse business requirements in the following functional areas - airline search & booking, payments, fulfilment, upsell & ancillary sales on the new ecommerce platform
- Managing the product backlog, backlog refinement, elaborating user stories, creating acceptance criteria, facilitating sprint planning, sprint review & demo, retrospective
- Mapping out all planning, implementation, QA, and release processes to identify areas of improvement in ways of working

Application Developer at Cognizant Technology Solutions

Location: United Kingdom, India

Duration: Aug 2004 – Apr 2008

Roles & Responsibilities:

- Lead J2EE developer in the mainframe to J2EE migration project for world's leading provider of digital flight information, intelligence and analytics for airports, airlines, and travel tech companies
- PL/SQL developer in a platform migration project for a UK based financial services company.
- TIBCO (Enterprise Application Integration) developer in a sales channel integration project for a leading global hotel chain
- Java & SQL trainer in the entry level training program for newly joined associates in the organisation

Education

- Bachelor of Engineering (Information Technology), Jadavpur University, 2000 - 2004
- Post Graduate Diploma in Management (MBA Equivalent), Indian Institute of Management, 2008 – 2010

Certifications

- Certified SAFe® 4.6 Agilist, 2019
- Professional Scrum Product Owner (PSPO) by Scrum.org, 2021
- Brainmates Accelerating into Product Leadership, 2023
- Brainmates Essentials of Product Management, 2022
- Certified Business Analysis Professional (CBAP®), IIBA, 2018
- Certificate in Requirements Engineering (BCS – Chartered Institute of IT, UK), 2014
- Foundation Certificate in Business Analysis (BCS – Chartered Institute of IT, UK), 2013
- Professional Scrum Master (PSM) by Scrum.org, 2021
- Strategic Digital Marketing, City University London, UK 2014
